

CleanSafe®

SPECIFIC ATTRIBUTES & FACTS / ADVANTAGES

TFT- PLASMA -LCD (TOUCH) SCREENS & MONITORS

Feature	Benefit
Non-toxic, does not contain alcohol or ANY solvent. Environmentally friendly and clean.	Can be used by anybody, everywhere, also by children, without precautions.
Anti-static	The special formula and reduces build up of dirt. This means less cleaning which further reduces the risk of damaging.
Bright, clear and sharp picture. CleanSafe® is optically pure as tested by virtually all renowned optical manufacturers	Improves picture definition and colour saturation. Safe and no disturbances.
Advanced screens work with coatings which are (very) sensitive. Water, or Gas, for example, can cause unrepairable damage	CleanSafe® is absolute safe, causes no stains, does not penetrate in the advanced coatings. CleanSafe® provides a protective coating. Longer lifetime, enhanced picture.
25 ml Air mix Spray. CFC / Aerosol free. Suited for more then 300 applications.	Safe, very economical also convenient (small) to take along.
Extensively tested. Users, laboratory and Industry tests have shown that CleanSafe® is a good and safe choice. Extremely high resistance and perfect pH values (detail on request)	Certainty, safety, no-risk, effective. Philips approved lowest risk product.
Extreme high purity of liquid . All reviewed competitive products are 'dirty' compared to CleanSafe® (details available)	The cleaner the product the less risk of damages.
Anti-bacterial – all components work towards optimal anti-bacterial effectiveness	Removal of and protection against bacterial contamination (details available)
Flexible	Can be used on ALL type of Screens - Glass, Synthetic, Polaroid, Quartz, and Coatings.
Instruction for use: Spray on and dry with a cloth.	Simple, fast, universal.
Easy to test.	See and Feel the difference.
<i>Attention: Most advanced screens, as discussed above, are made of (or are coated with) synthetic material. This material is, by definition, porous. This is the main reason that virtually all, non purpose developed, cleaners lead to hairline scratches, discoloring, reduced brightness and eventually permanent damage of the screens.</i>	<i>CleanSafe® (a.o. also approved for very sensitive aircraft systems) cleans without any solvent, protects and is in addition environment friendly.</i>
