

# CleanSafe® Liquid

## Basic Information

CleanSafe® liquids are a family of specially formulated products, each designed for use in different industries and markets.

All offer a truly unique way of keeping standard, special and coated glass, plastic, polycarbonate, acrylic, ceramic and metal surfaces, clean and protected with a non-toxic, anti-static, optically and acoustically pure and water repellent film. A real alternative to the usual aggressive and toxic cleaning products. We package to customer requirements, offering a choice of synthetic or aluminium pump spray containers in a variety of sizes and styles, all of recyclable material.

**CleanSafe® liquid products are hypoallergenic - ALCOHOL & SOLVENT free,**

**COMPLETELY NON-TOXIC, NON-POLLUTING AND TOTALLY SAFE  
- even for children to use-**

**Independent laboratory tests & Safety Data Sheets fully support these claims.**

Each CleanSafe® liquid is purpose-designed to clean and protect a specific type of product - copier glass, camera lens, computer screen, cd/dvd disk, car windscreen, spectacle lens, aircraft instruments, helmet visors, etc. - and is so simple to use.....

Just spray a little of the liquid onto the surface to be cleaned and wipe off dust and dirt. Repeat to remove long-term grime. That's all !

The difference can be **seen and felt** immediately. An anti-static protective film has been applied to the surface so new grime, dust and finger marks can be easily removed with a clean cloth. Re-spray as required.

A number of different formulae of this liquid are in use, endorsed by major companies in very varied markets.
