

CleanSafe®

SPECIFIC ATTRIBUTES & FACTS / ADVANTAGES

MOTOR HELMETS / MOTOR PARTS (LAMPS ETC.)

Attribute / Fact	Advantage
Non-toxic, does not contain alcohol or ANY solvent. Environmentally friendly and clean	Can be used by anybody, everywhere, also by children, without precautions
CleanSafe® does not contain ANY substance which can age the material used in the production of helmets/visors	Ageing leads to hardening and cracking of synthetic material and is caused by many cleaners except CleanSafe®.
Anti-static	The special formula helps to reduce build up of dirt. This means less cleaning which further reduces the risk of damaging.
CleanSafe® puts an optical neutral, flexible nano-thin, water repellent, protection layer on treated subjects	Most bugs are repelled and/or can be easily removed without damage. Water is repelled (with –wind- friction). The protection layer prevents material ageing.
Clear, crisp and sharp picture – CleanSafe® is optically neutral as tested by almost all leading optical companies.	Optimal vision and color. Safe and no distortions.
Anti-mist	The special anti-static film also ensures that treated subjects get less dim e.g. with changes in temperature.
Extensively tested. Users/ Laboratory and Industry tests have revealed that CleanSafe® is a good and safe choice. Iridium safe.	Security, no risk, effective
25 ml Air mix Spray. No Ozon. No Gas. Suited for 350-500 applications	Safe, very economical also convenient (small) to take along
Flexible	Can be used on ALL type of helmets / visors: (fiber)Glass, Synthetic, Polaroid, Quartz, Coated (Iridium). Also very effective on other smooth surfaces.
Easy to test	<u>See and Feel the difference</u>
